Biomedical Research Seminar Series
Speaker Announcement

Friday, Nov. 3, 2017, 3:30 pm

Domenici Hall, Rm 109

(Refreshments served at 3:00)

Dennis Harris, PhD,

*Associate Director
Content Strategy and Outcomes
Endocrine Society*

***Translating Hormone Science to Health at the Endocrine Society –
The Role of Nonprofits in Research***

Endocrine research is at the core of solving the most pressing public health challenges of our time, from diabetes and obesity, infertility, bone health, hormone-related cancers, and endocrine disrupting chemicals. Fortunately, the endocrine research community working to solve these challenges is equally expansive with intersections in developmental biology, signaling, metabolism, immunology, reproduction, and aging among many other fields. This talk will focus on the role of the Endocrine Society, a global nonprofit organization, in translating scientific discoveries in hormone research into medical breakthroughs and improved patient outcomes. The talk will discuss how the Endocrine Society supports the scientific community through competitive grant opportunities, mentorship programs, networking opportunities, and leading-edge meetings. The talk will highlight major initiatives of the Endocrine Society and discuss more broadly the impact nonprofit organizations have beyond peer-reviewed journals and scientific meetings. Specifically, the talk will discuss the evolving role of nonprofits in influencing national funding decisions, global public health policy, and medical practice standards.

The BMRS series is supported by the Office of the Provost, the College of Arts and Sciences, the Departments of Chemistry & Biochemistry and Biology, and the NM-INBRE, RISE, MARC, and HHMI programs.
